MAKE YOUR INTENTIONS CLEAR!

Keep both hands safely on the handlebars.

TURNTEC® T2

The rechargeable master of signaling

Suitable for any bicycle or e-bike* with

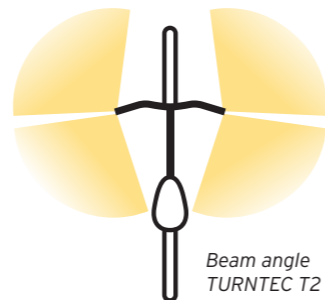

- Handlebars with a back-sweep from 0 - 20°
- an inner handlebar diameter of 17.5-19.5 mm

Quick to fit ...

Toolless installation in just a few minutes, the indicators on the TURNTEC T2 are securely fixed in both ends of the handlebars.

... easy to use.

Indicating with a small shift of your palm: our innovative ring switch ensures that you can ride steadily, brake easily and change direction safely even while indicating, with both hands on the handlebars.

TURNTEC® T4

The double plus in safety

Original size

Suitable for:

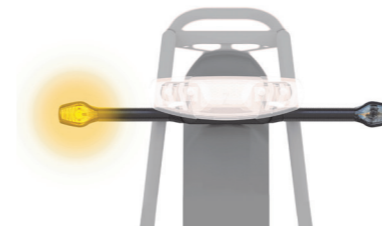

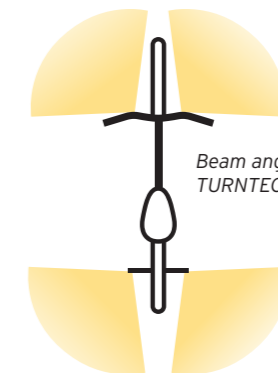

- connection to e-bike batteries 10-48 V DC
- all e-bikes and S-pedelects
- Bicycles with a suitable battery

Four indicators: two at the front, two at the rear

With the TURNTEC T4 indicator system, you'll noticeably improve your comfort and, above all, your safety whilst cycling. The two front indicators are mounted under the handlebars, whilst the rear ones are fitted to the sides of the luggage rack. Also available: a wide range of accessories for specific applications, e.g. cargo bikes.

Simple operation with a function button

A quick tap with your thumb activates the comfort flashing mode: just like in a car, the indicator switches off automatically after flashing several times.

Need help with installation?

You can find qualified specialist dealers near you here.

TURNTEC T4 at a glance:

- Ergonomic LEFT/RIGHT function button
- Power supply and signal connection via cable harness
- Fault detection if an indicator is faulty or not properly connected
- Spring loaded protection on rear modules.
- Splash- and rain-resistant
- Approved in accordance with StVZO and UN regulations

All the benefits, fitting videos and more!

TURNTEC T2 at a glance:

- Bright front and rear indicators: greater visibility on the road, day and night
- High-performance lithium-ion battery: Charge once via USB-C - flash for a month (depending on usage)
- Complies with StVZO
- Hazard light function for extra visibility in an emergency
- Sturdy aluminium housing
- Splash- and rain-resistant
- Sustainable thanks to a replaceable battery and high availability of spare parts

*not approved for S-pedelects

Indicators from the experts. For all bikes.

Your questions, our answers.

Why choose indicators from busch+müller?

We have been experts in bicycle lighting since 1925. Our focus: products for bicycles and e-bikes, helping you stay more visible on the road.

Can I lease the TURNTEC as well?

Indicators are considered permanently fitted accessories and as such often eligible for financing with bike leasing policies.

Why should I fit indicators?

Indicators improve safety whilst riding, as both hands remain on the handlebars. Furthermore, bikes with indicators are more likely to be seen and respected on the road, both day and night.

Are indicators permitted on bikes?

In many countries, indicators are allowed on bicycles. In Germany since 2024. Check your national traffic regulations. All busch+müller indicators comply with the StVZO.
